## News from Patparganj

Somesh Pal

On 3rd August 2019 in the area near Patparganj Mother Diary it rained heavily, whenever it rains water gets collected on the road. A lady was coming back from her office after doing her job at around 5:30pm. She fell down in the dirty water collected due to rain because of an over speeding bike. This incident took place in front of my eyes. I heard some people saying that government of Delhi or MCD should take some steps so that they can get rid of collecting excess dirty water after rainfall. So few young adults decided to meet the area Councilor with an application to find a permanent solution to it.

## Chacha Nehru

Dinesh Paul - Pragati Wheel School

On 14th November 1889 Chacha Nehru was born. He loved children very much and for this his birthday is celebrated as Children's Day all over India. This day is full of joy and happiness for all the children, they celebrate it in different ways like by going for school picnic, visiting museums and monuments, drawing, poetry and painting competitions were held at different places. They enjoy it with their friends and teachers.

Teacher's give gifts to their students. On that day children get full permission from their teachers to enjoy

Jawaharlal Nehru was an Indian independence activist, and subsequently, the first Prime Minister of India and a central figure in Indian politics before and after independence. He emerged as an eminent leader of the Indian independence movement under the leadership of Mahatma Gandhi and served India as Prime Minister from its establishment as an independent nation in 1947 until his death in 1964. Indian children knew him as Chacha Nehru

Vanshita and Ruchika - Udayan care

It is the most common way of communicating with each other. It changes and affects each person way of living .Most of the people believed that it only has negative influence on children and teenagers and it harms their eyes and brain but it has positive influence too. It helps us to communicate with our dear and near ones no matter in which part of the world they are staying and it has made our life very easy and simpler to communicate with each other and also to get various information. But there are pros and cons in every interventions .If we used it extremely or misuse it then both our brain and eyes would be affected. There are many people who spend most of their time on Facebook, Instagram, Twitter or What's App, then it is simply waste of time. So we should use it properly and take advantage of this wonderful intervention.

## JOY OF STUDYING

Shalu - Pragati Wheel School

Studying is a source of knowledge. I love studying because I get knowledge from it. We could study about the past, present and could also think of a better future. We learn new words and know about the culture and tradition of various countries of the world. Through texts we know about what our forefather's generation went through their lives.

My favorite subjects are English and Social Science. I enjoy reading English and Social Science. I enjoyed reading English literature. From Social Science we know about the culture of past. English is very important in life. If we have to go outside India we need to talk in English and when we go for higher studies or job interview we need to speak in English.

I believed that by studying, I would gain knowledge and become someone respectful in life. I hope to learn good habits, good behavior and to help others.

I want to become a good human being and that I would achieve through education.

## A Drop of Life

Monty Mathur- Pragati Wheel School

It's brighter than Silver  
It's more precious than gold  
It's sweeter than honey  
Whether hot or cold  
It's God's gift to the world  
Man needs to save it  
For ages to come  
What's that gem, if you wonder?  
I would love to tell you friends  
It's a drop of Water
